Education

Emerald High School, class of 2027
4.0, ACT: 34

Coursework

- Bioinformatics for Beginners, Coursera
- General Psychology, Foothill College
- Introduction to Computer Programming, Las Positas College
- Java Programming I, Gavilan College
- Java Programming II, Gavilan College
- Introduction to Statistics, Gavilan College
- Introduction to Public Health, Citrus College
- Introduction to Artificial Intelligence, Oxnard
- Introduction to Behavioral Neuroscience, Moorpark College
- Genetic Diseases, Merritt College

Organizations

- Limitless Dreams Foundation – Founder & President

Research Publications

- Leveraging Platform-Specific Guidelines for Improved Hate Speech Detection https://doi.org/10.36227/techrxiv.173997688.83952052/v1
- Tumor Resource Allocation using Transcriptomes and AI https://doi.org/10.67194/ajfys.v2i4.001
- A Coupled HPA–Mirror Neuron Model of Chronic Maternal Stress and Autism Susceptibility https://doi.org/10.36227/techrxiv.174495182.21947403/v1
- Atypical Brain Wave Distributions and Their Relationship to Social Functioning in Autism Spectrum Disorder https://ajfys.org/papers/569a4f00-1403-4926-be83-3cc6ce9e34d5

Experience

Research Assistant, Scanlon Lab, May 2026 – Present

- Analyzed sickle cell colony data to identify patterns relevant to disease research & researched preeclampsia impact on red blood cells

Society of Women Engineers, Outreach Director, Jan 2025 – Present

- Led outreach to 10+ schools, gathered 15+ student participants for STEM summer camp

Emerald Engineering Society, Board member, Jan 2025 – Present

- Organized math/physics track for largest student-led summit, over 175+ participants across 25+ interdisciplinary tracks and 5+ high schools

California Happy Teeth, Employee, August 2025 – Present

- Dental assistant with floating duties; shadowed dentists, managed files, billing, scheduling, and patient interactions

Projects

Unknown Gene Project, UC Berkeley, June–July 2025

- Researched unknown gene C17orf107 to discover link to myasthenic syndrome, cardiomyopathy, and breast cancer, guided by Dr. Kalina Lepente

Rethinking Alzheimer's: Evidence for a Vascular Pathogenesis on Alzheimer's Disease, May–Oct 2025

- Analyzed Hopfield model to support a vascular pathogenesis under Prof. Ruslan Rust and Prof. Charisse Winston under USC Neuro Scholars
- Presented to club's members and founder in club webinar among 6 presenters out of 50 applicants

Empowering Neurodivergent Learners: Low-Cost Science Learning, Johns Hopkins, June–July 2026

- Researched a project on autism neuroscience, advocacy, and educational solutions for neurodivergent individuals
- Selected in Student Speaker series among 165 presenters out of 430 applicants

Volunteering/Community Service

- Friends of Children of Special Needs – Volunteer & Instructor
  - Taught science classes using kits, created yearlong curriculum, debriefed volunteers
- Asha Jyothi – Campaign Leader
  - Led fundraising of $3.5k for renovations to Chaitanya school's facilities
- Dublin LEAD – Participant
  - Managed summer camps & recreational activities

Certifications & Awards

- AP Scholar Award with Distinction
- National Merit Scholar Commended (Index: 216)
- 1st place, Teen Biotech Challenge, UC Davis, Category: Drugs, Diagnostics, and Vaccines
- Best Biotechnology Project, Youth AI & Innovation Summit, UC Berkeley
- Student Speaker Series, Johns Hopkins Global Health Leadership Conference
- International Society of Computational Biology, Researcher & Presenter
- Biomedical Engineering Society, Researcher & Presenter
